Convention center Signage
Corporate communication network
Malls

Benefits

Multiple Media supported
Multiple windows
Web browser remote control
Create and send log files

Dynamique Signage Soft.

Medialon Display Player (MDP) is the heart of Medialon Display System. Medialon Display Player provides reliable and versatile multimedia playback for environments such as point of sales dynamic Signage, Corporate Communications, Museums Audiovisual Network etc ...

Users create, schedule and deliver multimedia contents using Medialon Display Controller. Display Player will run playlists and update multimedia content, including real-time URL's on display units such as Plasma screens, video projectors etc ...

Multimedia content like high quality graphics, digital video, animations etc., can be dynamically scheduled and adapted for each location.

Several Display Player windows can run simultaneously on the same screen.

SPECIFICATIONS
