

# MEDIALON MANAGER

## KIOSK

> **Interactive Kiosk application generator**

### FEATURES

- **Media Control for kiosk applications**
- **Programmable web browser**
- **Controllable Media Playback**
- **Drag & drop programming**
- **Logical Programming**
- **Real time testing (no Compile / Download / Test / Startover)**

### OVERVIEW

**Medialon Manager KIOSK** is a special edition of our award-winning Audiovisual Control Software.

We have taken the best parts of our control programming environment, the graphical user interface and the powerful yet easy programming tools and adapted it to Media Control for kiosk applications with two ideas in mind: making kiosk programming easier and more powerful.

With Manager KIOSK, you can easily build user interfaces with buttons, sliders, text displays, gauges, lists, and text entry fields as well as embedded media or video playback without being a C++ or Adobe Flash programmer. With simple drag and drop actions, you can program the behavior of the media and animation based on users' actions.

- **A Programmable Web Browser**

Manager KIOSK includes a completely programmable web browser. This allows you to prevent kids from using your Kiosks to log on to Facebook, keep track of sites visited, time out navigation after a while, and more, all easy functionalities possible with Manager KIOSK's embedded programmable web browser.

- **Controllable Media Playback**

Thanks to its programmable Media player, Manager Kiosk can keep track of popular media in your presentation or trigger external effects, such as lighting, when necessary.

- **Open to the World**

Manager KIOSK would not be a member of the Medialon family if it didn't have a link to our other controllers. Using the Medialon On Network protocol, you can link and synchronize your Kiosk applications with other Medialon controllers. Let your guests trigger larger shows, have them participate in a game, or why not send a "tweet" to Twitter or post their game results on their Facebook page, provided your programming allows them to do so.

You're in Control!

### APPLICATIONS

Manager KIOSK edition is the ultimate Kiosk application generator when link to other controls and link to external world is needed without the burden of doing C++ or Flash™ programming.

It can be used in Museum interactive Kiosk or Theme Park interactive attractions, etc.

### Part Number

- **MNG\_V6K** – Manager KIOSK, Interactive Kiosk application generator.

### Hardware Requirements

- Windows Vista™, Windows XP Pro™, Windows 7 (32 bits)
- Pentium IV minimum
- 256 RAM (512 recommended)
- XGA video card, 20GB hard disk

### Software Specifications

- Drag & Drop Programming
- Multitasking: several tasks can run simultaneously in synchronization or separately.
- Logical Programming Operators: +, -, \*, /, %, ^, =, ==, !=, >, <, >=, <=, |, &, #, ()
- Logical Programming Functions: Hours, Minutes, Seconds, Frames, Day, Day Of The Week As Name, Day Of The Week As Number, Month, Year, Lower Case, Upper Case, Length, Char At, Get Field Of Enum, Get Index Of Enum, Random, Sqrt, Round, Ceil, Floor, Abs, Max, Min, Sin, Asin, Tan, Atan, Cos, Acos, Ln, Log, Exp
- Variables Type: Integer, String, Time, Date, Enum. Unlimited number of variables
- OpenCap Protocol
- Log Files

### Extensions Supported

- IO over IP: Advantech Adam 6000 Serie
