Malls

Medialon Display Player is the heart of Medialon Display System. Medialon Display Player provides reliable and versatile multimedia playback for environments such as point of sales dynamic Signage, Corporate Communications, Museums Audiovisual Network, etc.

Users create, schedule and deliver multimedia contents using Medialon Display Controller. Display Player will run playlists and update multimedia content, including real-time URL's on display units such as Plasma screens, video projectors, etc.

Multimedia content like high quality graphics, digital video, animations, etc., can be dynamically scheduled and adapted for each location.

Several Display Player windows can run simultaneously on the same screen.

Medialon Display Player can display multiple independent windows on the same screen. Multiple windows are controlled like multiple independent Players.

Medialon Display Player Key Features:

- Reliable playback 24 hours a day, 7 days a week
- Supports standard graphic and digital audio & video
- Supports dynamic links to URL's
- Supports interactivity of standards media (HTML, PPT)
- Event log sent via Email for technical report & ad billing
- Set up, monitoring and remote control via web browser
- Software watchdog to ensure permanent run
- Automatic media download from ftp site, local and remote directory
- Supports satellite, ADSL and Ethernet connection
- Adjustable window size from 1x1 pixel to max size supported by the graphic card
- Adjustable position of windows
- Multiple XGA output graphic card supported for large window on multiple screen
- Scheduling of event by time, day, month & year
- Control of external devices via RS323, 422, 485
